WHEELED EXCAVATOR

SERIES / HW150ACR HW170ACR

Gross Power
129 kW (173 hp) at 2200 rpm

Bucket Capacity
0.70 ~ 1.05 m³

Net Power
127 kW (170 hp) at 2200 rpm

Operating Weight
17170 kg & 18820 kg

READY TO CHANGE YOUR WORLD

A

SERIES HW150A_{CR} HW170A_{CR}

Our new A-Series HW150A CR and HW170A CR are ready to build your world. The 4 cylinder Cummins B4.5 Stage V engine is perfectly balanced to deliver 129kW (173hp) with unmatched efficiency. Featuring a new tough exterior design with added safety features and a host of new cab features, you can rely the HW150A CR and HW170A CR to provide maximum mobility and productivity on the toughest construction sites and infrastructure projects.

THE BEST PRODUCTIVITY AND FUEL EFFICIENCY

From its upgraded, eco-friendly engine to its carefully chosen control technologies, the HW150A CR and HW170A CR wheeled excavators help operators to achieve new heights of productivity. Hyundai's LUDV (Advanced Load Sensing) hydraulic system, combined with attachment flow control, ECO Gauge and proportional joysticks and pedal control, enables the machine to deliver the exact performance and efficiency when and where it's needed.

EU Stage V Certified Engine

Now in its fourth decade of continuous improvement, the B4.5 Cummins engine features an EGR-free design for increased fuel economy and longer maintenance intervals, contributing to a reduced cost of operation.

The Cummins B4.5 engine satisfies the strictest environmental emission regulation in the world including a 60% reduction in Particulate Matter (PM).

The technology to improve efficiency

Load sensing hydraulics

The HW A-Series features Hyundai's LUDV Load Sensing hydraulic system. This allows for multi-functional operation and precise machine movements. Control is smooth and predictable, even with a demanding workload. By delivering power exactly when needed, the system also contributes to fuel savings.

Reversible fan

The HW A Series provides excellent cooling performance by increasing heat dissipation and reducing downtime caused by overheating.

Eco gauge

Helps operators to reduce emissions and running costs by constantly monitoring efficiency. It displays engine workload and fuel-saving status while the machine is working.

Eco Gauge

A true compact radius for enhanced manoeuvrability. Ultra-short rear swing radius enables the HW A CR Series wheeled excavators to work on narrow construction sites.

UP TO **11%** EFFICIENCY
(Compared to previous model)

Carriage versatility ▲

Both blade and dozer are interchangeable on the front and rear. With its hitch preparation kit, the HW A-Series is also trailer hitch ready.

Attachment flow control ▶

The HW A Series optimizes attachments for effective flow rate setting depending on attachments (ten breaker types and ten crusher types), enabling various operations matching the site environments.

Fuel rate information

Fuel information is displayed as average rate and latest fuel consumed, for guidance to economical operating.

Engine auto-idle

The auto-idle feature saves fuel, reduces noise and cuts exhaust emissions by automatically switching the engine to idle setting when the excavator is inactive.

NEW EXTERIOR DESIGN FOR ROBUSTNESS AND SAFETY

The true value of the HW A-Series lies in its durability and high productivity. The robust upper and lower frame structure can endure external shock and heavy work loads. Attachment performance has been proven through rigorous field testing. No matter how tough the working environment is, you can always rely on the HYUNDAI Excavator HW A-Series.

Tougher from the ground up

Reinforced durability ▶

Built for unbeatable strength and sturdiness, the HW A-Series offers solid performance over its lifespan. The upper and lower frame structures are reinforced for tough working conditions, while the attachments have been rigorously tested for the roughest conditions.

Reinforced pins, bushings and polymer shims

The HW A series improves lubricity of connecting parts between the equipment and attachments. Gaps with attachments are minimized by wear-resistant long-life pins, bushings, and polymer shims, supporting the highest performance with invariable durability.

Better weight balance

The machine upper frame has been moved forward from the swing center to reduce the tail swing radius and the swing support height has been lowered to optimize weight balance.

Durable cooling module

Tested to extremes, the HW A Series has a durable cooling module proven to perform at maximum productivity levels in the toughest working environments.

The machine has been designed for high stability, easy handling and excellent manoeuvrability.

Cabin structure

The HW A-Series cabin structure uses integrally welded low-stress, high strength steel to meet ROPS and FOG certification.

- **ROPS:** Roll-Over Protective Structure ISO12117-2
- **FOPS:** Falling Object Protective Structure
- **FOG:** Falling Object Guard Level 2 (Option) ISO10262

Hi-grade (high-pressure) hoses ▶

The HW A-Series uses high-pressure hoses with improved heat and pressure resistance, greatly increasing the durability of the equipment.

The 4-wheel hydrostatic drive system ensures a smooth driving experience, even in rough conditions.

EASY CONTROL AND COMFORTABLE OPERATION

Many electronic functions are concentrated in the most convenient spot for operators to improve work efficiency. The highly-advanced infotainment system, a product of Hyundai's intensive information technology development, enables both productivity and comfort while working. The HW A-Series really is designed with the operator in mind.

Ergonomic for efficient operation

Intelligent & wide cluster ▶

The 8" capacitive-type display is similar to a smartphone to deliver excellent legibility. Amongst the key functions the centralised switches on the display allow convenient checking of the Adblue/DEF level and temperature outside the cabin.

Auxiliary joystick and pedal control ▶

A 2-way proportional auxiliary joystick and pedal control enable effortless operation to minimise operator fatigue.

Proportional auxiliary hydraulic system ▶

A proportional control switch with better speed control provides operators with added convenience whenever they do time-consuming work. This function can also be switched to control by foot pedal, by changing the setting in the cluster menu.

Jog Dial Module ▶

The accelerator, remote air conditioner controller and instrument cluster can be operated using the convenient jog shuttle-type controller.

Functionality at your fingertips

Joystick steering

The HW A-Series features right-hand joystick steering for quick, easy manoeuvring and enhanced productivity.

Work mode memory

The operator can select from three different work modes – Park, Work and Travel – for convenient automatic control of a range of functions

FNR and ram lock switch

The Forward/Reverse switch is positioned right at the operator's fingertip. The front axle oscillation lock can also be activated from the joystick, improving convenience and productivity on demanding jobs.

Fine swing & swing lock system

This option enables smooth movement at the start and stop of swing operation (cushion swing). The swing lock function provides additional safety, during road travel or transportation.

The HW A-Series is designed with the operator in mind. Many electronic functions are concentrated in the most convenient spot for operators to improve work efficiency.

13%
INCREASE IN CABIN SPACE

A deluxe seat and full climate control provide a comfortable working environment for the operator.

THE ULTIMATE SAFE ENVIRONMENT

The Hyundai approach to safety goes far beyond just meeting regulatory standards. We prioritise safety in every aspect of our machines and work with our customers to keep improving protection for operators, co-workers, passers-by, surrounding buildings and of course the machines themselves.

The short swing radius gives operators extra peace of mind and improves safety for colleagues and passers-by: while working on one lane of a road, the machine can swing without disturbing traffic on the second lane.

Visibly safer

AAVM (Advanced Around View Monitoring) camera system

The HX A-Series has a state-of-the-art AAVM video camera system to give an unobscured 360 degree field of vision for operators.

- **IMOD** (Intelligent Moving Object Detection): Informs when people or dangerous objects are detected within the range of operation (recognition distance: 5m).

Secure field of vision in all directions through ten views including 3D bird's eye view and 2D/4CH view.

Built for safer operation

Cabin viscous mount

A coil spring and damper inside the cabin viscous mounts improve durability and provide a comfortable operating environment that lessens fatigue.

Emergency steering

If the hydraulic supply should fail, manual steering is automatically enabled.

Side camera

In addition to the standard rear view camera, there is an optional right hand side camera for giving the operator improved visibility.

Seat belt warning alarm

If the seat belt is not buckled when the ignition key is turned, an alarm is triggered in intervals along with a continuous visual alert. This emphasises our priority for operator safety

Electronic swing brake

An electronic valve and control system has been added to improve safety and utilisation. The opening and closing time of the swing brake valve is controlled according to the sensing and control system.

Cruise control & speed limiter

Cruise control and speed limiter allows the operator to regulate speed whilst in transit. An automatic creep speed enables the operator to concentrate on finer machine control and operation.

Axles and fenders

The HW A-Series has been equipped with a heavy duty axle for higher durability and to enhance stability in different conditions and material handling applications. Sturdy fenders, covering the wheel even when steering, have been added to protect the tyres from flying debris while driving.

Activate Auto Safety Check

The Auto Safety Lock prevents unintended operation due to the excavator not being controlled solely by the RCV lever.

SERVICEABILITY AND TELEMATICS

Our A-Series excavators are designed with quick, low-effort servicing in mind. Every component and material has been optimised to ensure a long, trouble-free life. Hyundai's innovative Hi MATE telematics system enables full monitoring of machine activity and performance. Maximum connectivity is integrated to help owners create a smart construction site and protect profitability as their business grows.

Less maintenance. More uptime

Improved routine maintenance

Easy access for maintenance means regular checks get done faster, giving you more uptime and reducing operating costs. Ground level access to filters, lube fittings and master switches make servicing more convenient.

Longer maintenance intervals

The service interval of the fuel filter on the new engine has been increased by 100% (from 500h to 1000h). In addition the long life hydraulic oil (5000h change interval) contributes greatly to reduce the maintenance cost.

100%
IMPROVEMENT IN SERVICE INTERVAL

Hi MATE

It's convenient, easy and valuable. Hi MATE, Hyundai's remote management system, utilises GPS-satellite technology to provide customers with the highest level of service and product support available.

Increase productivity

By providing information such as service hours, idle time and fuel consumption, Hi MATE saves you money and improves productivity. Service alerts enable better maintenance planning.

ECD

(Engine Connected Diagnostics)

ECD provides troubleshooting information as well as tailored servicing. Service technicians are supported with remote diagnostics allowing them to achieve quick resolution rate

Monitor your machines

Hi MATE's real-time location information allows convenient monitoring of your equipment via the Hi MATE website or mobile app.

Mobile fleet app

Our Mobile Fleet app provides all the information you need to run your fleet efficiently and economically.

Improve Security

Protect your equipment from theft or unauthorised usage. Hi MATE's geofencing alerts notify you automatically when a machine leaves a predetermined zone.

HCE-DT Air allows service technicians to connect to your equipment wirelessly via smartphone and laptop right on site.

Keeping you covered

Hyundai genuine parts and accessories are designed to keep your machine running at optimum performance, providing increased uptime, comfort and productivity. Our 13000m² European Parts Warehouse guarantees 24-hour delivery across our dealer network.

Hyundai Standard and Extended Warranty Programmes are also available, providing peace of mind and giving you full control over your operating costs.

TAKE THE TOUR!

A

SERIES HW150A_{CR} HW170A_{CR}

Productivity & Efficiency

- High-performing Stage V engine with advanced exhaust aftertreatment **NEW**
- Load sensing hydraulic system **NEW**
- Variable Power Control **NEW**
- Hydrostatic 4-wheel drive
- Eco gauge
- Trailer hitch preparation **NEW** **OPTION**
- Electronically controlled reversible fan **NEW**
- Tiltrotator **NEW** **OPTION**
- 2D and 3D grading-ready **NEW** **OPTION**
- Floating boom position **OPTION**

Comfort

- 3-way adjustable steering column **NEW**
- Largest touchscreen monitor on the market (incl. WiFi)
- Attachment flow control
- Joystick steering **OPTION**
- FNR and Ram Lock Switch on Joystick **NEW**
- Ride control **NEW** **OPTION**
- Cruise control & speed limiter
- Advanced audio system
- Full climate control

Durability

- Reinforced upper and lower frame structure
- Reinforced pins, bushings and polymer shims
- Durable cooling module
- Hi-grade (high-pressure) hoses
- Centralised greasing system **OPTION**

Serviceability & Connectivity

- ECD (Engine Connected Diagnostics) **NEW**
- Improved DEF/AdBlue filler access
- Fuel filler pump with auto stop **OPTION**
- Hyundai Hi MATE telematics system
- Mobile Fleet app **OPTION**

Safety

- Advanced Around View Monitoring (AAVM) camera system **OPTION**
- LED working lights
- ROPS / FOPS certified cabin
- Safety glass
- Wide axle and fenders (HW170A CR only) **OPTION**
- Auto safety lock **NEW**
- Safety valves on all cylinders
- Automatic digging brake **NEW** **OPTION**

HW150A CR / HW170A CR SPECIFICATIONS

SPECIFICATIONS		HW150A CR	HW170A CR
ENGINE			
Maker / Model	CUMMINS / B4.5		
Type	4 cylinder, water cooled, 4-cycle, turbocharged charge air cooled, direct injection, electronic controlled diesel engine.		
Gross Power	129 kW (173 hp) at 2200 rpm		
Net Power	127 kW (170 hp) at 2200 rpm		
Max. Power	129 kW (173 hp) at 2200 rpm		
Peak Torque	780 N·m at 1500 rpm		
Displacement	4.5 l		
HYDRAULIC SYSTEM			
Advanced Load Sensing System (LUDV) Load independent flow sharing			
MAIN PUMP			
Type	Variable displacement pump		
Max. flow	261 lpm @ 1800 rpm		
AUX PUMP			
Type	Piston pump		
Max. flow	60 lpm		
* Load Sensing - Variable displacement pump : LUDV (load independent flow sharing)			
HYDRAULIC MOTORS			
Travel	Bent - axis piston motor with brake valve and parking brake		
Swing	Radial Piston Motor		
RELIEF VALVE SETTING			
Implement circuits	350 kgf/cm ² (4970 psi)		
Travel	380 kgf/cm ² (5400 psi)		
Power boost (boom, arm, bucket)	380 kgf/cm ² (5400 psi)		
Swing circuit	285 kgf/cm ² (4050 psi)		
Pilot circuit	35 kgf/cm ² (500 psi)		
Service valve	Installed		
HYDRAULIC CYLINDERS			
No. of cylinder bore x stroke	Arm:	1-115 x 1138 mm	1-120 x 1235 mm
	Bucket:	1-100 x 850 mm	1-105 x 995 mm
	Blade:	2-110 x 235 mm	2-110 x 235 mm
	Outrigger:	2-125 x 463 mm	2-125 x 463 mm
	Monoboom:	1-105 x 1,105mm	
	2-PCS boom:	2-105 x 992mm	2-110 x 992mm
Adjust(boom):	1-145 x 634mm	1-160 x 624mm	
* Hyundai Bio Hydraulic Oil (HBHO) available.			
DRIVES & BRAKES			
4-wheel hydrostatic drive. Constant mesh, helical gear transmission provides 2 forward and reverse travel speeds.			
Max. drawbar pull	9234 kgf	10720 kgf	
Travel speed	1st: 9.5 km/h	1st: 9.5 km/h	
	2nd: 35 km/h or 20 km/h (Option)	2nd: 35 km/h or 20 km/h (Option)	
Gradeability	30°(70 %)	35°(70 %)	
Service Brake : - Independent dual brake, front and rear axle full hydraulic power brake. - Spring released and hydraulic applied wet type multiple disc brake. Parking Brake : - Spring applied and hydraulic released wet disc brake type in transmission.			
CONTROLS			
Pilot control	Two joysticks with one safety lever (LH): Swing and arm, (RH): Boom and bucket (ISO) FNR switch on RH joystick / Ram lock switch on LH joystick		
Attachment Control	3 modes available: Push / Proportional / Permanent		
Engine throttle	Electric, Dial type		
Operation Mode	3 modes available: P-Parking W-Working T-Travel		

SPECIFICATIONS		HW150A CR	HW170A CR
AXLE & WHEELS			
Full floating front axle is supported by center pin for oscillation. Oscillation lock (ram lock) function for safe operation. Rear axle is fixed on the lower chassis.			
Tyres	10.00-20-14PR, Dual (tube type)		
(Optional)	10.00-20, Dual (solid type) 10.00-20-16PR, Dual (tube type)		
STEERING SYSTEM			
Hydraulically actuated, orbitrol type steering system actuates on front wheels through steering cylinders.			
Min. turning radius	6300 mm		
SWING SYSTEM			
Swing motor	Fixed displacement radial piston motor		
Swing reduction	Planetary gear reduction		
Swing bearing lubrication	Grease-bathed		
Swing brake	Multi wet disc		
Swing speed	9.3 rpm		
COOLANT & LUBRICANT CAPACITY			
	liter		
Fuel tank	200		
Engine coolant	19.5		
Engine oil	11		
Swing device - gear oil (OPT)	6.2 (5.0)		
Swing device - grease (OPT)	(1.2)		
Axle	Front	15.5	
	Rear	17.5	
Transmission	2.5		
Hydraulic system (including tank)	187		
Hydraulic tank	103		
DEF/AdBlue®	27		
UNDERCARRIAGE			
Reinforced box-section frame is all-welded, low-stress. Dozer blade and outriggers are available. A pin-on design.			
Dozer blade	Parallelogram-mounted dozer blade to support machine when working, also for leveling and back filling.		
Outrigger	Indicated for max. operation stability when digging and lifting. Can be mounted on front/or rear.		
OPERATING WEIGHT (APPROXIMATE)			
HW150A CR: Operating weight, including 4710 mm 2pc boom, 2450 mm arm, SAE heaped 0.70 m ³ bucket, lubricant, coolant, full fuel tank, hydraulic tank and standard equipment.			
HW170A CR: Operating weight, including 5000 mm 2pc boom, 2450 mm arm, SAE heaped 0.70 m ³ bucket, lubricant, coolant, full fuel tank, hydraulic tank and standard equipment.			
OPERATING WEIGHT			
Rear dozer blade	17170 kg	18820 kg	
Rear outriggers	17440 kg	19090 kg	
Front outriggers and rear blade	18390 kg	20040 kg	
Front blade and rear outriggers	18390 kg	20040 kg	
Four outriggers	18660 kg	20310 kg	
AIR CONDITIONING SYSTEM			
The air conditioning system contains fluorinated greenhouse gas refrigerant R134a (Global Warming Potential = 1430). The system contains 0.75 kg of refrigerant representing a CO ₂ equivalent of 1.07 metric tonnes.

- Lifting capacities are based on ISO 10567.
- Lifting capacity of the HW A-series does not exceed 75% of tipping load with the machine on firm, level ground or 87% of full hydraulic capacity.
- The Lift-point is bucket pivot mounting pin on the arm (without bucket mass).
- (*) indicates load limited by hydraulic capacity.
- Caution: please be aware of the local regulations and instructions for lifting operations.
